

PROJECT NAME: National Academy of Sciences (NAS) Radiation Study

RECIPIENT: National Academy of Sciences

LOCATION: Washington, D.C.

PURPOSE: Funds would be used to update the 2005 NAS Assessment of the Scientific Information for the Radiation Exposure Screening and Education Program to review new scientific data to determine whether or not the current Radiation Education Compensation Act (RECA) program should be expanded. More specifically, recommendations would be made on whether additional diseases or illnesses, classes of workers, and geographic areas should be compensated through RECA.

AMOUNT: \$1,000,000
